Individual numbered parts (comprising multiple papers, notes and book reviews) in *Austrobaileya*, were generally published on an annual basis between 1977 and 2020. Each volume usually comprised four parts (initially five), published over one to five years. The publication dates of previous parts were usually given in the subsequent one and are of significance for documenting when new names were officially published in relation to listing in online databases such as the *Australian Plant Name Index* (APNI) and the *International Plant Names Index* (IPNI).

Between 1977 and 2019, a single numbered part was generally published in any one year as hard copy. Prior to 2020, commencing with 10(3) in 2015, papers were subsequently placed online after hard copy publication. In 2020, papers were first published online with the dates of publication indicated on the individual papers; these were still within numbered parts, followed by a hard copy volume at the end of that year.

As of 2020, volumes were compiled on an annual basis, i.e. all papers published in a calendar year comprise a single volume.

From 2021, publication of papers was moved entirely online, without numbered parts and with the dates of publication indicated on the individual papers.

The publication dates of volumes, individual parts and papers therein are indicated in **Table 1**. Journal parts with single, or a couple of missing pages are mainly the consequence of commencing new parts on an odd numbered page. The responsible Editor and Editorial Committee are also provided as they were sometimes missing from a published part, or the information was lost when the parts were bound as library volumes.

**Table 1. *Austrobaileya* publication dates 1977–2022, (\* indicates missing pages due to commencing journal parts on an odd page)**

Volume Number	Part Number	Pagination	Editor	Editorial Committee	Date of Publication
