RE - Queensland Heritage Register Number (QHR): 602493 Victoria Park (North)

I/We fully support the inclusion of Victoria Park [North] on the Queensland Heritage Register. This support is on the basis that the application clearly meets the following five criteria for cultural heritage recognition.

1. The place is important in demonstrating the evolution or pattern of Queensland's history.

Over the course of its history Victoria Park [North] functions have included

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- significant involvement in World War II and the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development.
- brickmaking and timber-felling industries • scientific experimentation • campsites for displaced people
- sports and recreation grounds

2. The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

3. The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland. Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period. Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of this era's public architecture.

4. The place is important because of its aesthetic significance.

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place's natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

5. The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons.

The entire Barrambin Victoria Park has a special association with the people of Brisbane as a popular inner-city park for organised sport and informal recreation (having served the community formally since 1875 as a valued green space for recreational purposes).

Also, we believe that Victoria Park should be one consolidated park with one level of heritage recognition. We therefore support the North and South Victoria Parks becoming one integrated listing on the Queensland Heritage Register.

Queensland Heritage Register Number (QHR): 602493 Victoria Park (North)

I/We fully support the inclusion of Victoria Park [North] on the Queensland Heritage Register. This is because it clearly meets the following five criteria for cultural heritage recognition.

1.The place is important in demonstrating the evolution or pattern of Queensland’s history.

Over the course of its history Victoria Park [North] functions have included

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- brickmaking and timber-felling industries
- municipal rubbish dump
- scientific experimentation
- campsites for displaced people
- sports and recreation grounds;
- significant involvement in World War II and
- the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development

2.The place has potential to yield information that will contribute to an understanding of Queensland’s history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

3.The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland. Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period. Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of public architecture from this era.

4.The place is important because of its aesthetic significance.

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place’s natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland. Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period. Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of this era's public architecture.

4.The place is important because of its aesthetic significance.

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place's natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

5.The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons.

The entire Barrambin Victoria Park has a special association with the people of Brisbane as a popular inner-city park for organised sport and informal recreation (having served the community formally since 1875 as a valued green space for recreational purposes).

Also, we believe that Victoria Park should be one consolidated park with one level of heritage recognition. We therefore support the North and South Victoria Parks becoming one integrated listing on the Queensland Heritage Register.

RE - Queensland Heritage Register Number (QHR): 602493 Victoria Park (North)

I/We fully support the inclusion of Victoria Park [North] on the Queensland Heritage Register. This support is on the basis that the application clearly meets the following five criteria for cultural heritage recognition.

1.The place is important in demonstrating the evolution or pattern of Queensland's history.

Over the course of its history Victoria Park [North] functions have included

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- significant involvement in World War II and the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development.
- brickmaking and timber-felling industries • scientific experimentation • campsites for displaced people
- sports and recreation grounds

2.The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

3.The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland. Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period. Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of this era's public architecture.

I fully support the inclusion of Victoria Park [North] on the Queensland Heritage Register. This support is on the basis that the application clearly meets the following five criteria for cultural heritage recognition.

1.The place is important in demonstrating the evolution or pattern of Queensland's history.

Over the course of its history Victoria Park [North] functions have included

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- significant involvement in World War II and the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development.
- brickmaking and timber-felling industries • scientific experimentation • campsites for displaced people
- sports and recreation grounds

2.The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

3.The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland. Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period. Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of this era's public architecture.

4.The place is important because of its aesthetic significance.

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place's natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

5.The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons.

The entire Barrambin Victoria Park has a special association with the people of Brisbane as a popular inner-city park for organised sport and informal recreation (having served the community formally since 1875 as a valued green space for recreational purposes).

Also, I believe that Victoria Park should be one consolidated park with one level of heritage recognition. We therefore support the North and South Victoria Parks becoming one integrated listing on the Queensland Heritage Register.

RE - Queensland Heritage Register Number (QHR): 602493 Victoria Park (North)

I support the inclusion of Victoria Park [North] on the Queensland Heritage Register. This support is on the basis that the application clearly meets the following five criteria for cultural heritage recognition.

1.The place is important in demonstrating the evolution or pattern of Queensland's history.

Over the course of its history Victoria Park [North] functions have included

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- significant involvement in World War II and the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development.
- brickmaking and timber-felling industries • scientific experimentation • campsites for displaced people
- sports and recreation grounds.

Additionally, other historical considerations are -

- Importance as an early part of town planning of Brisbane by the declaration of a reserve in 1875.
- Importance as an identified location/setting for Government House in the early 20th century.
- Brisbane City Council's Master Plan clearly identifies the cultural importance of this land to the history of Brisbane in its proposals.

2.The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

Victoria Park is one of the few open space areas available for future investigations into past use close to the CBD and should be protected for further historic and scientific research.

3.The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland. Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period. Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of this era's public architecture.

The park has provided a backdrop to the Clubhouse and Royal Brisbane Hospital for generations and its setting can be considered to be integral to the identity of the suburb of Herston and the Queensland University of Technology - Kelvin Grove.

4.The place is important because of its aesthetic significance.

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place's natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

In addition, it has the following unique attributes –

- It provides a (public) panoramic view of the historic suburb of Spring Hill and city, not publicly available from any other part of Brisbane.
- it provides an aesthetic backdrop to the urban development to the north from Spring Hill
- It is recognised as a “Great Place” in Shaping SEQ – the South East Queensland Regional Plan (No 74)
- The public park forms part of a wider recreational link between the Brisbane River, Roma Street Parkland and Exhibition Grounds/ and historic Bowen Park.
- Victoria Park (North) is the distinctive northern gateway to the City fringe areas of Fortitude Valley and Spring Hill.

5.The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons.

Barrambin’s wider park and area has a special association with local indigenous groups and its historical importance as a meeting and ceremonial place has been well documented.

The entire Barrambin -Victoria Park has a special association with the people of Brisbane as a popular inner-city park for organised sport and informal recreation (having served the community formally since 1875 as a valued green space for recreational purposes) and as a setting for the Royal Brisbane Hospital and Exhibition and city fringe

A newspaper article in the Telegraph, 11 January 1886, indicated that that past, Brisbane residents felt strongly enough to write in support of the park (rather than a rifle range) “*as being essential to the health and happiness of the general population*”. Barrabmin – Victoria Park, as one of the few publicly available areas of green space close to the CBD, is also likely to be highly valued by future generations of Brisbane residents.

Also, I believe that Victoria Park should be one consolidated park with one level of heritage recognition. I therefore support the North and South Victoria Parks becoming one integrated listing on the Queensland Heritage Register.

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- significant involvement in World War II and the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development.
- brickmaking and timber-felling industries • scientific experimentation • campsites for displaced people
- sports and recreation grounds

2.The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

3.The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland.

Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period. Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of this era's public architecture.

4.The place is important because of its aesthetic significance.

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place's natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

5.The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons.

The entire Barrambin Victoria Park has a special association with the people of Brisbane as a popular inner-city park for organised sport and informal recreation (having served the community formally since 1875 as a valued green space for recreational purposes).

Also, we believe that Victoria Park should be one consolidated park with one level of heritage recognition. We therefore support the North and South Victoria Parks becoming one integrated listing on the Queensland Heritage Register.

RE - Queensland Heritage Register Number (QHR): 602493 Victoria Park (North)

I/We fully support the inclusion of Victoria Park [North] on the Queensland Heritage Register. This support is on the basis that the application clearly meets the following five criteria for cultural heritage recognition.

1.The place is important in demonstrating the evolution or pattern of Queensland's history.

Over the course of its history Victoria Park [North] functions have included

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- significant involvement in World War II and the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development.
- brickmaking and timber-felling industries • scientific experimentation • campsites for displaced people
- sports and recreation grounds

2.The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

3.The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland. Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period. Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of this era's public architecture.

4.The place is important because of its aesthetic significance.

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place's natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

Dear Chief Executive

**Brisbane Residents United submission to the Queensland Heritage Register
Number (QHR): 602493 Victoria Park (North)**

Thank you for the opportunity to make this submission to the Queensland Heritage Register.

This submission is made on behalf of Brisbane Residents United (BRU), Brisbane's peak body for community resident actions groups. Whose purpose is to:

- Represent Brisbane and surrounding district residents and provide them with a united voice to Governments on matters pertaining to urban planning and development.
- Act as a resource centre, facilitating information sharing across established and start-up local resident associations.

BRU is a non-partisan and not-for-profit incorporated association that represent the interests of the broader community.

We fully support the inclusion of Victoria Park [North] on the Queensland Heritage Register. This is because it clearly meets the following five criteria for cultural heritage recognition.

1.The place is important in demonstrating the evolution or pattern of Queensland's history.

Over the course of its history Victoria Park [North] functions have included

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- brickmaking and timber-felling industries
- municipal rubbish dump
- scientific experimentation
- campsites for displaced people
- sports and recreation grounds;
- significant involvement in World War II and
- the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development.

2.The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

3.The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland. Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period.

Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of public architecture from this era.

4.The place is important because of its aesthetic significance.

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place's natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

5.The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons.

The entire Barrambin Victoria Park has a special association with the people of Brisbane as a popular inner-city park for organised sport and informal recreation (having served the community formally since 1875 as a valued green space for recreational purposes).

Victoria Park was originally gazetted as one large area and we think it should be one consolidated park with one level of heritage recognition. We therefore support the North

and South Victoria Parks becoming one integrated listing on the Queensland Heritage Register.

Yours sincerely

Elizabeth Handley

President.

The Brisbane Residents United Inc Steering Group

Heritage Branch

RE - Queensland Heritage Register Number (QHR): 602493 Victoria Park (North)

I/We fully support the inclusion of Victoria Park [North] on the Queensland Heritage Register. This support is on the basis that the application clearly meets the following five criteria for cultural heritage recognition.

1.The place is important in demonstrating the evolution or pattern of Queensland's history.

Over the course of its history Victoria Park [North] functions have included

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- significant involvement in World War II and the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development.
- brickmaking and timber-felling industries • scientific experimentation • campsites for displaced people
- sports and recreation grounds

2.The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

3.The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland.

Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period. Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of this era's public architecture.

4.The place is important because of its aesthetic significance.

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place's natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

5.The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons.

The entire Barrambin Victoria Park has a special association with the people of Brisbane as a popular inner-city park for organised sport and informal recreation (having served the community formally since 1875 as a valued green space for recreational purposes).

Also, we believe that Victoria Park should be one consolidated park with one level of heritage recognition. We therefore support the North and South Victoria Parks becoming one integrated listing on the Queensland Heritage Register.

Queensland Heritage Register Number (QHR): 602493 Victoria Park (North)

I fully support the inclusion of Victoria Park [North] on the Queensland Heritage Register. This is because it clearly meets the following five criteria for cultural heritage recognition.

1. The place is important in demonstrating the evolution or pattern of Queensland's history.

Over the course of its history Victoria Park [North] functions have included

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- brickmaking and timber-felling industries
- municipal rubbish dump
- scientific experimentation
- campsites for displaced people
- sports and recreation grounds;
- significant involvement in World War II and
- the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development

2. The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

3. The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland. Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period. Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of public architecture from this era.

4. The place is important because of its aesthetic significance.

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place's natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

5. The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons.

The entire Barrambin Victoria Park has a special association with the people of Brisbane as a popular inner-city park for organised sport and informal recreation (having served the community formally since 1875 as a valued green space for recreational purposes).

Also, we believe that Victoria Park should be one consolidated park with one level of heritage recognition. We therefore support the North and South Victoria Parks becoming one integrated listing on the Queensland Heritage Register.

Not only do I support the heritage listing, but I vehemently oppose the building of any stadium in Victoria Park. The park is not just vacant land, as the proponents of the stadium/stadia seem to believe. It belongs to the people of Brisbane by law, not just to Brisbane City Council. It is a vital green space for residents and visitors, and home to a large variety of wildlife, and must be kept this way.

Sincerely

Ruth Ridgway

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place's natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

5. The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons.

The entire Barrambin Victoria Park has a special association with the people of Brisbane as a popular inner-city park for organised sport and informal recreation (having served the community formally since 1875 as a valued green space for recreational purposes).

Also, we believe that Victoria Park should be one consolidated park with one level of heritage recognition. We therefore support the North and South Victoria Parks becoming one integrated listing on the Queensland Heritage Register.

RE - Queensland Heritage Register Number (QHR): 602493 Victoria Park (North)

I/We fully support the inclusion of Victoria Park [North] on the Queensland Heritage Register. This support is on the basis that the application clearly meets the following five criteria for cultural heritage recognition.

1.The place is important in demonstrating the evolution or pattern of Queensland's history.

Over the course of its history Victoria Park [North] functions have included

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- significant involvement in World War II and the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development.
- brickmaking and timber-felling industries • scientific experimentation • campsites for displaced people
- sports and recreation grounds

2.The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

3.The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland.

Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period. Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of this era's public architecture.

4.The place is important because of its aesthetic significance.

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place's natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

5.The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons.
