RE - Queensland Heritage Register Number (QHR): 602493 Victoria Park (North)

I/We fully support the inclusion of Victoria Park [North] on the Queensland Heritage Register. This support is on the basis that the application clearly meets the following five criteria for cultural heritage recognition.

1. The place is important in demonstrating the evolution or pattern of Queensland's history.

Over the course of its history Victoria Park [North] functions have included

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- significant involvement in World War II and the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development.
- brickmaking and timber-felling industries • scientific experimentation • campsites for displaced people
- sports and recreation grounds

2. The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

3. The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland. Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period. Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of this era's public architecture.

4. The place is important because of its aesthetic significance.

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place's natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

5. The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons.

The entire Barrambin Victoria Park has a special association with the people of Brisbane as a popular inner-city park for organised sport and informal recreation (having served the community formally since 1875 as a valued green space for recreational purposes).

Also, we believe that Victoria Park should be one consolidated park with one level of heritage recognition. We therefore support the North and South Victoria Parks becoming one integrated listing on the Queensland Heritage Register.

Queensland Heritage Register Number (QHR): 602493 Victoria Park (North)

I/We fully support the inclusion of Victoria Park [North] on the Queensland Heritage Register. This is because it clearly meets the following five criteria for cultural heritage recognition.

1. The place is important in demonstrating the evolution or pattern of Queensland's history.

Over the course of its history Victoria Park [North] functions have included

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- brickmaking and timber-felling industries
- municipal rubbish dump
- scientific experimentation
- campsites for displaced people
- sports and recreation grounds;
- significant involvement in World War II and
- the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development

2. The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

RE - Queensland Heritage Register Number (QHR): 602493 Victoria Park (North)

I/We fully support the inclusion of Victoria Park [North] on the Queensland Heritage Register. This support is on the basis that the application clearly meets the following five criteria for cultural heritage recognition.

1. The place is important in demonstrating the evolution or pattern of Queensland's history.

Over the course of its history Victoria Park [North] functions have included

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- significant involvement in World War II and the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development.
- brickmaking and timber-felling industries • scientific experimentation • campsites for displaced people
- sports and recreation grounds

2. The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

3. The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland.

Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period. Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of this era's public architecture.

4. The place is important because of its aesthetic significance.

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place's natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

5. The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons.

The entire Barrambin Victoria Park has a special association with the people of Brisbane as a popular inner-city park for organised sport and informal recreation (having served the community formally since 1875 as a valued green space for recreational purposes).

Also, we believe that Victoria Park should be one consolidated park with one level of heritage recognition. We therefore support the North and South Victoria Parks becoming one integrated listing on the Queensland Heritage Register.

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- significant involvement in World War II and the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development.
- brickmaking and timber-felling industries • scientific experimentation • campsites for displaced people
- sports and recreation grounds

2. The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

3. The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland.

Historically, it illustrates the growing emphasis on recreational spaces and community amenities in the post-war period. Architecturally, the clubhouse embodies the modernist design ethos of the 1970s, with its clean, functional forms and integration into the surrounding landscape, representing a notable example of this era's public architecture.

4. The place is important because of its aesthetic significance.

Victoria Park (North) is significant for its aesthetic attributes, derived from the juxtaposition of the place's natural qualities with its metropolitan setting, and from the aesthetic contribution of the 1975 former Victoria Park Golf Clubhouse.

5. The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons.

The entire Barrambin Victoria Park has a special association with the people of Brisbane as a popular inner-city park for organised sport and informal recreation (having served the community formally since 1875 as a valued green space for recreational purposes).

Also, we believe that Victoria Park should be one consolidated park with one level of heritage recognition. We therefore support the North and South Victoria Parks becoming one integrated listing on the Queensland Heritage Register.

RE - Queensland Heritage Register Number (QHR): 602493 Victoria Park (North)

I/We fully support the inclusion of Victoria Park [North] on the Queensland Heritage Register. This support is on the basis that the application clearly meets the following five criteria for cultural heritage recognition.

1. The place is important in demonstrating the evolution or pattern of Queensland's history.

Over the course of its history Victoria Park [North] functions have included

- social, cultural and sustenance grounds for Aboriginal people in the colonial period
- significant involvement in World War II and the subsequent utilisation of built assets constructed during the war to provide housing for individuals and families and then for medical research and economic development.
- brickmaking and timber-felling industries • scientific experimentation • campsites for displaced people
- sports and recreation grounds

2. The place has potential to yield information that will contribute to an understanding of Queensland's history.

Victoria Park has the potential to contribute knowledge that will lead to a greater understanding of early urban material culture, consumption and disposal habits in Queensland, and early and evolved service infrastructure and occupation activities on the urban fringe.

3. The place is important in demonstrating the principal characteristics of a particular class of cultural places.

The Victoria Park Golf Clubhouse is a significant example of mid-20th century civic architecture in Queensland.
